

Subject: Consolidated Mutual Water Company (CMWC) in Stage Orange Drought-What You Need to Know

Dear Community Members,

Record low snowpack and streamflow forecasts have triggered Consolidated Mutual Water Company's Drought Management Plan – **Stage Orange**. While we continue to monitor conditions daily, current projections indicate reduced water availability throughout the summer.

What to Expect:

- Enforcement of a **more restrictive outdoor water use** policy.
- **Irrigation restrictions: 2 days/week only.** Even numbered addresses (Sunday and Thursday), Odd numbered addresses (Wednesday and Saturday).
- Some nonessential uses may be temporarily restricted.
- Water usage rate increases for Tier 2 and Tier 3 are forthcoming.

How to Prepare

- Plan and set your irrigation schedules accordingly.
- Evaluate opportunities to reduce demand.
- Visit our website for more information: <https://www.cmwc.net/>

We are committed to transparency and timely communication as conditions change. Additional updates will be shared on our website and through email.

Thank you for your partnership in protecting our water supply.

Sincerely,

Consolidated Mutual Water Company

Jarod Roberts

Vice President – Chief of Water Resources
